

The screenshot shows the AWS IoT console interface. At the top, there are navigation tabs: 'Browse', 'Action', 'Device Types', and 'Interfaces'. On the right, there is an 'Add Device' button and a 'Device Simulator' toggle. Below the navigation bar, a search bar is labeled 'Search by Device ID'. The main content area displays a list of devices. The selected device is 'weather_today', which is 'Disconnected'. Below the device list, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is active, showing a message: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table of recent events.

Event	Value	Format	Last Received
event_1	{"Temperature":54,"humidity":35}	json	a few seconds ago
event_1	{"Temperature":2,"humidity":77}	json	a few seconds ago
event_1	{"Temperature":1,"humidity":4}	json	a few seconds ago
event_1	{"Temperature":18,"humidity":14}	json	a few seconds ago
event_1	{"Temperature":74,"humidity":4}	json	a few seconds ago
